

The image features several golden wheat stalks on the right side, set against a background of soft, radiating light rays. The wheat is ripe and detailed, with individual grains clearly visible. The overall color palette is warm, dominated by yellows and oranges.

Shijiazhuang Goldrain I/E Co.,Ltd.

About Goldrain

- Our factory established in 1998, located in Shijiazhuang city, Hebei province, China. We do international business from 2009. We Goldrain engaged in grain and oil industry, we committed to become a leader in grain and oil machinery industry, our principle is Technological innovation these years .

We guarantee every product quality that goes out from Goldrain.

We promise 24 hours efficient worry-free service !

We firmly believe that value comes from professional, wisdom comes from practice. As a smart city best practices, we will make every effort to innovation and development.

* Professional in these items: Silo

Flour mill

* Now these years, according to customers' requirements, we also sell Oil press machine, Bakery equipment , Farming machinery

* We have agent in Canada, Congo, Nigeria

* Our market in : Africa, Asia, Oceania , South America

* Our website : www.goldrainmachine.com

Flour Mill

Wheat flour mill:

Raw material : soft wheat, hard wheat, Durum wheat

Final products: wheat flour, semolina, bran

Capacity : 10 tonnes /24hrs---500 tonnes /24hrs

Corn flour mill:

Raw material : White corn, Yellow Corn, Red corn

Final products: Corn flour, Corn grits, Germ, bran

Capacity : 10 tons /24hrs---300 tons / 24hrs

Some Projects

30 Ton in Congo

50 Tons in Brazil

50 Tons in Tanzania

30 Tons in Zambia

50 Tons in Nigeria

200 ton in America

200 tons in Dubai

5 TONNES in Benin

Silo

Type :Flat bottom / conical bottom

Silo material:hot galvanizing steel sheet

Steel silo assembled by silo body and silo top.

1. Silo body:

high quality hot galvanized steel plates -----rolled into corrugation and made into standard connection holes-----plates are connected by high strength screw bolts

---Steel plates:

1): Plates interval is injected by water-proof daub belts that are for aviation special purpose .

2):silo plates' thickness distribution is set according to equal strength theory which makes the silo plates bear average stress. The vertical friction is supported by the stiffeners.

---Screw bolts:

round galvanized steel washers and connection holes with age-resistant and water-proof washers

The Silo body Assisted with :

1) repairing door

2) outside ladder

3) ladder guard rings etc

2. Silo top:

The silo top adopts umbrella frame and the frame material is made of C model straight carbon steel. The ceiling is made of galvanized steel tile plates. the silo top served with natural ventilation windows, manhole, ladder, safety guards.

How can i put the grain into the silo ?

-----Use scraper conveyor, bucket elevator to conveying the grains into the silo

If the raw grain is dirty , can i store ?

As usual , the raw grain contents a lot of impurities, which will do harm to working machine, block it, shorten the machine's working life during the storage processing, it will cause problems for the machine before loading the grain .

Besides, such impurities will low grain storage quality and shorten storage time. Because if the existing of impurities, it contains more bacteria and easy getting mildew and this is the beginning of the whole grain's mildew.

So clean is important for long time storage.

How can i store it in a right way ?

1. Pre-clean sieve help us remove the impurities.
2. Also equipped dust-removal system to filter the dust and tinny impurities.

Then our grain will be more clean and reach to storage status for loading into the silo.

Complete line

Raw grain-----Cleaning system-----Dryer (if your grain with moisture)-----Load-----Silo-----Unload-----to the workshop or a truck

raw Galvanized sheet

feeding part

silo sheet corrugated molding machine

computer-punch

Finalize the design wall

arc-forming-machine

finished product

PROJECTS

6*1000 ton in Albania

2*1000 ton in Australia

4*500 ton silo in Brazil

6*2000 MT Silo Mongolia

2*1000 ton Melbourne

1000 ton in Algeria
